4 Operation

[GENERAL] Place the package after band installation, and press the start button. Then the machine straps the package and the band feeds again automatically for next strapping.

1. Turn the power switch on and preheat the machine about 1 minute.

2. Push the band into the slot slow while pressing the feed button.

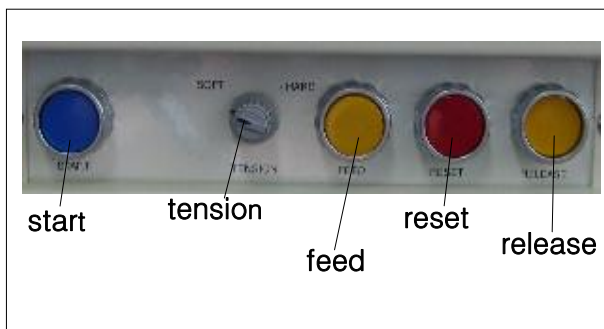

Release the button after the band turns one cycle along the rail and stop.

3. Place the package or bank note to strap in the middle of table.

Make sure that the package should be placed in the middle of the table to cover the sensor. Otherwise, it cannot start with the sensor uncovered.

4. Press the start button and the machine straps the package or the bundle of bank note automatically returns to the start position to strap again.

Button Description

start button: Press the start button to strap bank note package. The band straps the pack of bank note automatically and feed along the rail again. Ready to do the next strapping.

Tension volume: The user can adjust the tension of this button for user's purpose. You can choose one lever of 5tension (0/100,2/100, 4/100, 8/100, 16/100)soft-hard

Feed button: Insert the band tip into band slot while pressing the feed s/w and band will feed along the rail and release the feed s/w after installed.

reset button: If any problem happens with the machine, pull the band out of the machine, and press the reset button. This button will not operate after the band is installed.

release button: This button is to remove the damaged band. If the band stop during feeding or if you like to remove the band, then pull the while pressing this release button.

power switch: Preheat this switch about 1minute after power is on before you operate the machine.

Adjustment of heater's temperature

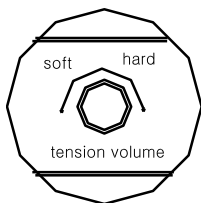

If the bands are not weld properly, turn the heater volume clock wise to make the temperature appropriate.(output voltage:4.3~6.3V)

Recommended temperature: set switch volume at 6~7.

Adjustment of Tension

Turn the tension control volume clockwise of counter-clockwise in the front panel to adjust tension.

Tension control can pull much more the band by the set time.

5 Troubling shooting

STATE	Check and Management
1. Machine does not operate	<ul style="list-style-type: none"> *Check if the power cord is unplugged.(Check if the power is on.) *Check if the voltage is AC220 *Check if the safety switch operate.(Check if the cover is properly closed)
2. Machine does not start	<ul style="list-style-type: none"> *Check if the sensor is covered.
3. Band is not inserted properly	<ul style="list-style-type: none"> *Check if the band is bent much. *Check if the band guide in reel box operates smoothly. (Remove foreign materials)
4. Strapping is not strong	<ul style="list-style-type: none"> *Check if the tension switch is set soft. *Check if the tension device move up and down. *Clean the roller part with methyl alcohol.
5. Band does not return to start position	<ul style="list-style-type: none"> *Check if the band is bent. *Press reset button to return to first setting value. *Remove foreign materials in the slide and feed slide. Check if the pestle of feed slide moves smoothly when band comes full circle along rail.
6. Feed and reset does not work	<ul style="list-style-type: none"> *Check if ms6,ms4 switch
7. Band does not go to start position, stopping halfway in the rail	<ul style="list-style-type: none"> *Check if reel guide revolves smoothly *Check band too
